# Black Eye™ Endoscopic Marker

Keep an  on that lesion

**Black Eye™** is indicated for permanently marking lesions **in the GI tract.**

*(Replaces Spot Ex and Endomark)*

## Permanent

Black Eye™ leaves a permanent mark, as carbon black is a stable and safe pigment; resulting in a "Lifetime of Surveillance"

## Safe

Blister packaging acts as a sterile barrier and protects against cross-contamination; maintaining sterility from manufacturing until usage

**+ 50% Less PLASTIC WASTE**

## "No Shake" Necessary! = *Easier, Faster, Safer!*

Black Eye™ Proprietary formula provides stable Emulsion and Suspension. It is more viscous and does not migrate like other Tattoo Products; resulting in consistently dark, permanent marks

## Proven in 50 countries

Proven worldwide in over 50 countries for 7 years

*FDA & CE Approved / Made of Medical Grade Carbon Black / 5ml Sterile and Pre-filled Syringe / Shelf Life: 2 years*
