

TS-905

# Blue Eye™

Submucosal Injection Agent

## Keep that lesion lifted

Blue Eye™ is indicated for submucosal lift of lesions in the GI tract.

### Long-lasting

Blue Eye™ has 2X longer-lasting mucosal elevation than normal saline, which reduces entire procedure time and increases the success rate of the endoscopic procedure.

### Safe

Blister packaging acts as a sterile barrier and protects against cross-contamination; maintaining sterility from manufacturing until usage

### Easy to use

Unlike conventional ampoule products, Blue Eye™ is easy to use because it can be connected directly with the injection needle

### Biocompatible

Blue Eye™ is biocompatible; it contains hyaluronic acid, a biopolymer naturally present in the human dermis.

Made in Korea / CE certificate / 5ml Sterile and Pre-filled Syringe / Shelf Life: 2 years
